

W3Now Site Manager Instant Payment Notification (IPN) Variables

<https://www.w3shoppingcart.com>

Note: All variable field names are posted in upper-case.

How to reference the fields in your program script:

- **PHP Field Reference:**
\$_POST["FIELDNAME"]
- **ASP/ Field Reference:**
Request.Form("FIELDNAME")
- **Coldfusion Reference:**
FORM["FIELDNAME"] or Form.FIELDNAME

Added in the customer's

Notes

Product or Payment or Download or Gift Certificate

Your unique item number

Your item name

The quantity of the item purchased

Your item price (each /per unit)

Your item sale Unit like Each or Case or Set

If your shipping method allows entering shipping amounts per item, this is the shipping charged for this item.

No or Monthly or Annually

1 or 0 Representing Yes or No. Indicates if the customer's credit card was Approved (not Charged) for this item

Notes

Add To Cart form entry question (Form Field Title)

The customer's selection regarding the question

The amount added to the price of the item based on the selection. If nothing is added, 0.00 is sent.

FORMFIELDTYPE_xx_yy	VARCHAR	SELECTION/RADIO
---------------------	---------	-----------------

FORMFIELDNAME_xx_yy	VARCHAR	SELECTION_aa_bb
---------------------	---------	-----------------

ADDITIONAL CUSTOMER SELECTION FIELDS - ffname equals the value of the FORMFIELDNAME_xx_yy \ unique in an item, so the xx qualifier is not needed here. Used to reference the actual form field name for the a

Form Field Name	Data Type	Example
ffname_yy	VARCHAR	Extra Large
ffname_FORMTITLE_yy	VARCHAR	Please Select Your Size
ffname_ADDTOPPRICE_yy	MONEY	3.00
ffname_TYPE_yy	VARCHAR	SELECTION/RADIO

SECURITY INFORMATION FIELDS

[See Security Information](#)

PASSWORD	VARCHAR	MyPassword
----------	---------	------------

APPENDIX A - Possible Customer Selection / Input Field Types

List of Possible Values for the First Part of FORMFIELDTYPE_xx_yy (before the slash)

COUNTRY
DATE
DOMAIN
EMAIL
INTEGER
LARGETEXT
NAME
PASSWORD
PHONE
POSTAL
SELECTION
SELECTIONS
TEXT
